TRUECERT™

Certificate of Analysis System

Scott Medical is excited to present the TrueCert Certificate of Analysis. Our TrueCert system is a completely integrated report of our manufacturing process, giving you all the information you may require on each individual mixture. Loaded with information, lot specific, detailed, and easily readable, the TrueCert gives you even more confidence in the accuracy and quality of your calibration gas from Scott Medical Products.

TrueCert also has an added feature-it can save you time. Each TrueCert is available in multiple ways from Scott, including access by the Internet via eScott. TrueCert is available at any time by fax, mail, or the Internet, and coming soon by e-mail.

Below is a reference guide to outline the various components of a TrueCert. In addition, each TrueCert sent with your shipment will include a glossary of definitions.
