Ingestion	: Harmful if swallowed.
Chronic Health Hazard	: This product contains no listed carcinogens according to Directive 67/548/EEC, IARC, ACGIH and/or NTP in concentrations of 0.1 percent or greater. May cause allergic skin reaction.
Aggravated Medical Condition	: Eye disease Skin disorders and Allergies.
Target Organs	: Eyes. Skin.
Symptoms	: Repeated and/or prolonged exposure to low concentrations of vapors and/or aerosols may cause: Sore throat.

---

## 4. FIRST AID MEASURES

General advice	: Seek medical advice. If breathing has stopped or is labored, give assisted respirations. Supplemental oxygen may be indicated. If the heart has stopped, trained personnel should begin cardiopulmonary resuscitation immediately.
Eye contact	: Rinse immediately with plenty of water also under the eyelids for at least 20 minutes. Remove contact lenses.
Skin contact	: Wash off immediately with plenty of water for at least 20 minutes. Wash off with soap and water. Immediately remove contaminated clothing, and any extraneous chemical, if possible to do so without delay. Take off contaminated clothing and shoes immediately. NOTE TO PHYSICIANS: Application of corticosteroid cream has been effective in treating skin irritation.
Ingestion	: Never give anything by mouth to an unconscious person. If a person vomits when lying on his back, place him in the recovery position. Prevent aspiration of vomit. Turn victim's head to the side.
Inhalation	: If breathing has stopped or is labored, give assisted respirations. Supplemental oxygen may be indicated. If the heart has stopped, trained personnel should begin cardiopulmonary resuscitation immediately. Move to fresh air.

## 5. FIRE-FIGHTING MEASURES

Suitable extinguishing media	: The product itself does not burn. Carbon dioxide (CO <sub>2</sub> ). Dry chemical. Dry sand. Limestone powder.
Specific hazards	: Incomplete combustion may form carbon monoxide. Potential dust explosion hazard. As discussed in NFPA 68 and NFPA 69 standards, mixing any dust that can propagate a deflagration with flammable vapor will increase the hazard rating. Where explosive dusts are contained in equipment, that equipment should contain adequate explosion relief vents, explosion suppression systems, or an oxygen-deficient atmosphere. Care should be taken to prevent the escape of dust from horizontal surfaces. Downwind personnel must be evacuated.
